CANYON RUST 1 BG / YD

CANYON RUST 2 BG / YD

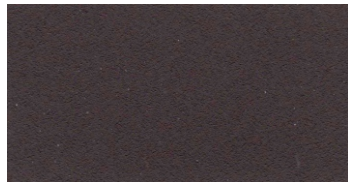

RED BRICK 2 BG / YD

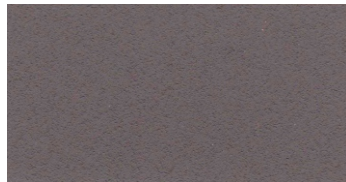

DesignCrete Integral Colors are synthetic Iron Oxide pigments used in ready mix concrete. All pigments are permanent, light-fast, inert and stable to atmospheric conditions. DesignCrete Integral Colors comply with ASTM C979.

Use this chart as a guideline only. Colors shown are representative of integrally colored concrete sealed with one of DesignCrete's decorative concrete sealer products.

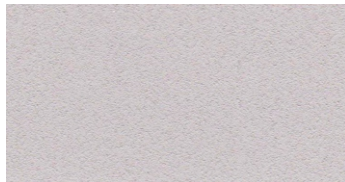

DESIGNCRETE RELEASE AGENT

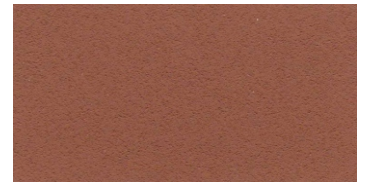

CHARCOAL

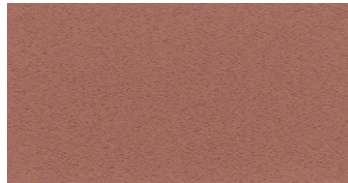

LIGHT GRAY

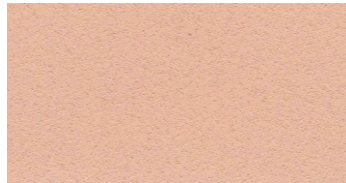

STONE GRAY

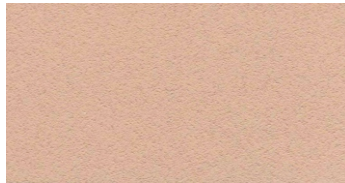

DARK BROWN

MEDIUM BROWN

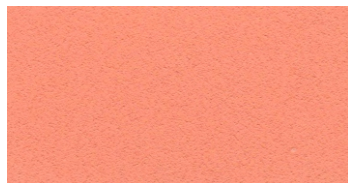

LIGHT BROWN

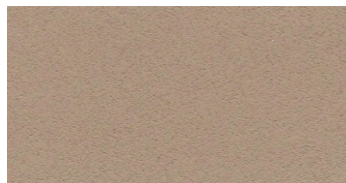

CREAM BEIGE

GRAY

TERRA COTTA

MOSS GREEN

INTEGRAL COLORS can be used for sidewalks, pool decks and more. For residential and commercial application, it is a very durable option, especially for heavy-traffic areas. RELEASE AGENTS are not required as there is an alternative of liquid release. LIQUID RELEASE works the same way as the release agent preventing sticking to the molds. This alternative is a much cleaner way to go when in the process of stamped concrete but does not provide the secondary colors accents as the release agent.

DesignCrete Powder Release is a special formulation of color pigments (ASTM-C979), hydrophobic powder and proprietary ingredients specially formulated for stamped concrete. Powder release is intended to add color variations and highlights to the textured surface resulting in a close resemblance to natural materials such as slate, stone, brick, etc. We also offer a liquid release option to avoid a secondary color.

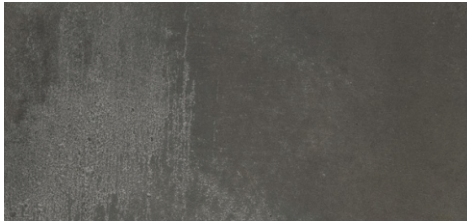

H&C SEMI-TRANSPARENT DECORATIVE STAINS

ARCTIC STONE

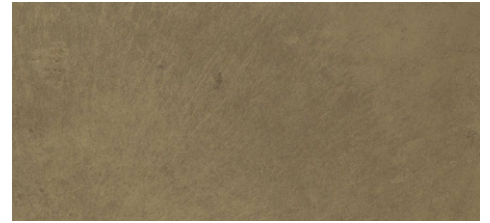

TUMBLED STONE

OBSIDIAN

ESPRESSO

COCOA BEAN

DAHLIA RED

PUMPKIN SPICE

AUTUMN BREEZE

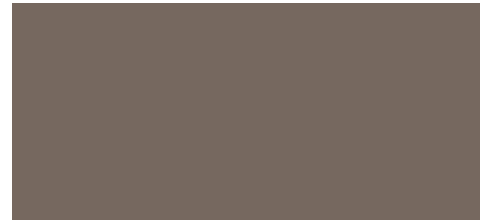

Water-based semi-transparent decorative stain is the best way to go when looking to enhance your concrete surface with colors. Stains can be a near perfect match, since it can be diluted or mixed to create infinite custom colors, producing vibrant coloring effects when enhanced. Decorative stain is UV resistant. Custom staining requires high maintenance as it tends to fade out over time.

These colors are a representation. Actual color will vary due to the concrete finishing method (how smooth or porous the surface is), producing a mottling or distressed appearance. Colors are on a gray concrete base and stain is diluted with water 1:1. Please test color prior to use.

ANTIQUE-IT™

POOL BLUE

NUTMEG

STONE GRAY

LIGHT GRAY

DARK GRAY

CREAM BEIGE

GOLDEN SANDSTONE

TERRA COTTA

*BRICKFORM Antique-It is a water soluble antiquing agent designed to impart color or highlight over stamped concrete or textured overlays. When properly applied, Antique-It is a quick and simple way to highlight textured concrete surfaces. **Basic Uses:** Use Antique-It to highlight or add color to newly placed or existing concrete surfaces. The effects of Antique-It are most pronounced on stamped or textured concrete.*
